GenAI Ops: Reusable Operational Prompt Template System

Duration : 90 Min.

Scenario

Build an operational prompt template manager ('template_manager.py') that organizes reusable templates across 8 operational categories with variable substitution.

Target File Location & Creation

File to Create/Update: `student_workspace/template_manager.py` **Input Resource File to Inspect**: `student_workspace/op_categories_spec.txt`

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Inspect `generated_script.py` in `student_workspace/`. - Create or update `student_workspace/template_manager.py` and populate it with valid analysis results.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Open and inspect `generated_script.py` inside `student_workspace/`.
3. Create or open `student_workspace/template_manager.py` in `student_workspace/` and record your answers.
4. Save your changes (`Ctrl + S` or `Cmd + S`).
5. Open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.
6. Verify your progress by running `python run.py` locally in the terminal.

Validation

Once you have saved your files and verified your progress, return to the platform dashboard and click the **"Run Test" / "Verify"** button. This will automatically evaluate your changes and generate your score!

Your performance will be evaluated based on the following test cases:

Test Case	Requirement	Marks
TC1	template_manager.py is syntax-valid Python	4 Marks

TC2	Supports 8 operational categories (Incident, Log, RCA, Change, etc.)	4 Marks
TC3	Implements variable substitution engine for {placeholders}	4 Marks
TC4	Outputs valid template_library.json	4 Marks
TC5	Validates template variable completeness	3 Marks
TC6	Prevents duplicate template names	2 Marks
TC7	Provides template search by category function	2 Marks
TC8	Exports default system prompt configuration	2 Marks

Total Score: 25 Marks

Important Notes

- This is an auto-evaluated question. Ensure all code edits are properly saved and the 'run.py' checks pass before submission.
