GenAI Ops: Integrated Real-World AI Ops Incident Resolution Workshop

Duration : 90 Min.

Scenario

A major production incident occurred. Run an integrated AI Ops resolution workflow: analyze ticket, audit AI-suggested commands, sanitize logs, apply CRISP prompts, and generate RCA.

Target File Location & Creation

File to Create/Update: `student_workspace/integrated_rca_workshop.json` **Input Resource File to Inspect**: `student_workspace/capstone_incident_data.txt`

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Inspect `capstone_incident_data.txt` in `student_workspace/`. - Create or update `student_workspace/integrated_rca_workshop.json` and populate it with valid analysis results.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Open and inspect `incident_bundle.json` inside `student_workspace/`.
3. Create or open `student_workspace/integrated_rca_workshop.json` in `student_workspace/` and record your answers.
4. Save your changes (`Ctrl + S` or `Cmd + S`).
5. Open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.
6. Verify your progress by running `python run.py` locally in the terminal.

Validation

Once you have saved your files and verified your progress, return to the platform dashboard and click the **"Run Test" / "Verify"** button. This will automatically evaluate your changes and generate your score!

Your performance will be evaluated based on the following test cases:

Test Case	Requirement	Marks
TC1	integrated_rca_workshop.json exists and is valid JSON	4 Marks

TC2	Incident root cause correctly mapped to database deadlock	4 Marks
TC3	AI-suggested command audit completed (dangerous commands flagged)	4 Marks
TC4	Log PII and API keys sanitized	4 Marks
TC5	CRISP framework prompt applied for ticket response	3 Marks
TC6	Remediation verification checklist provided	2 Marks
TC7	Post-mortem timeline entries sequential	2 Marks
TC8	Long-term AI Ops governance recommendation included	2 Marks

Total Score: 25 Marks

Important Notes

- This is an auto-evaluated question. Ensure all code edits are properly saved and the 'run.py' checks pass before submission.
