ITSM Lab: Ten Live Tickets, Zero Mistakes - Run-Tower Role Mapping & ITIL Process Routing

Duration : 30 Min.

Scenario

A newly onboarded service desk engineer is provided with an iRUN estate organizational hierarchy and 10 redacted operational tickets from the previous week. The engineer must inspect each ticket description, determine the correct governing ITIL 4 process (Incident, Problem, Change, Service Request, or SLM), route the ticket to the appropriate support tier (L1.5, L2, L3, SRE, or AIOps), and convert a legacy siloed escalation flow into an integrated iRUN flow with projected MTTR delta.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Analyze 10 incoming ticket payloads and accurately map each to its governing ITIL 4 lifecycle practice. - Assign each ticket to the exact iRUN support role with technical justification. - Draft an integrated iRUN escalation workflow replacing legacy tier-bouncing, estimating the MTTR reduction.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Accurate classification of 10 operational tickets across ITIL 4 processes and iRUN support tiers (L1.5, L2, L3, SRE, AIOps): 5 marks
2. Conversion of legacy siloed escalation workflow into an integrated iRUN flow with quantified MTTR impact justification: 5 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
