ITSM Lab: ITIL v4 Service Value Chain Traceability - Mapping Incident Lifecycle Through Six Activities

Duration : 60 Min.

Scenario

An enterprise e-commerce platform experiences repeated service degradation during marketing campaigns. The service operations team must trace the lifecycle of this recurring incident across all six Service Value Chain activities (Plan, Improve, Engage, Design & Transition, Obtain/Build, Deliver & Support) and demonstrate how the ITIL 4 Guiding Principles (such as 'Focus on Value' and 'Collaborate and Promote Visibility') guide tactical decision-making.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Map the complete end-to-end lifecycle of an incident through all six Service Value Chain activities. - Demonstrate that the Service Value Chain is an interconnected network rather than a linear waterfall process. - Apply three ITIL 4 Guiding Principles to real service desk operational challenges.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Complete and accurate mapping of the incident lifecycle across all six Service Value Chain activities: 4 marks
2. Demonstration of non-linear activity triggers (how Deliver & Support triggers Improve and Design & Transition): 3 marks
3. Concrete application of at least three ITIL 4 Guiding Principles to resolve operational trade-offs: 3 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
